

Choosing a Hazardous Waste Hauler & Waste Management Company:

Carefully choosing a hauler and designating a waste management facility is important. The waste management facility will be handling your wastes, but your company is still responsible for proper management. Checking sources, choosing a hauler, and designating facility may take some time-Begin checking haulers before you need to ship your waste. When choosing a hauler or designating a facility, check the following sources:

- ◆ Friends and colleagues in business who have used a hazardous waste facility in the past.
- ◆ Trade association(s) which may keep a file on companies that handle hazardous wastes.
- ◆ Better Business Bureau or Chamber of Commerce to find out if any complaints have been registered against a hauler or facility.
- ◆ State Hazardous Waste Management Agency or EPA Regional Office will be able to tell you whether a company has a US EPA Identification Number and may know whether the company has any problems.
- ◆ Visit the facility to find out how waste is managed.
- ◆ After checking sources, contact the hauler or hazardous waste management facility directly to verify that they have US EPA Identification Number(s), necessary permits, & insurance.
- ◆ Check that the hauler's vehicles are in good condition & meet all requirements of the Dept. of Transportation.

"This is not a complete list. Please call the Pollution Prevention (p2) Program at 873-7058 to add your company's name to this list. The City of Albuquerque's p2 Program does not recommend, endorse, or promote any particular company, product, service, or technique. The information in this handout is furnished as a service."

TTY Users may call any of the numbers listed through Relay New Mexico at 1-800-659-8331.
